

## Solar Energy Resources for Nebraska Businesses

**Check out our Directory:** [Nebraska Solar Businesses](#)

### **Incentives & Rebates**

[Business Energy Investment Tax Credit \(ITC\)](#), *Database of State Incentives for Renewables & Efficiency (DSIRE)*

Federal Incentive: Currently 30%

Lincoln Electric System: [Customer-Owned Renewable Generation Rebate Program](#)

Southern-facing fixed solar: \$375/kW-DC of nameplate capacity

Western-facing fixed solar: \$475/kW-DC of nameplate capacity

Single or dual tracking solar: \$475/kW-DC of nameplate capacity

### **Rural Energy for America Program (REAP) Grants & Loans**

Small businesses in eligible rural areas and agricultural producers, both rural and non-rural, who have at least 50% of their gross income coming from agricultural operations, may apply. [Check eligible business addresses](#). REAP grants provide up to 25% of the total project costs, and a grant and loan combination up to 75%. Eligible projects include renewable energy systems and the purchase, installation and construction of energy efficiency improvements. See [REAP Fact Sheet](#) for a complete list of eligible projects.
